FLEXIBLE PACKAGING

The ideal anilox roll
for your flexo printing

FLEXIBLE PACKAGING

Presently, there is an increasing demand for high-quality print motifs and thus the demand for larger screen counts on printing plates and anilox rolls. The quality of today's printing plates requires an even and pinpoint inking of the elements. The selection of our engraving portfolio listed below shows you options to optimize your respective printing processes. TLS Anilox GmbH offers custom-made solutions.

TEROLUX™

Think about tomorrow! Experience a new dimension of durability with our innovative hard-metal coating "TeroLux™".

TLS ANILOX TYPES OF ENGRAVING

	<p>TeroMin™</p>	<ul style="list-style-type: none"> • 60° – our standard engraving • homogenous area coverage • prevents Moiré effect 		<p>The established "Standard" in flexo printing. Our TeroMin™ engravings help you optimize and standardize your day-to-day, recurring printing result in a consistent and reproducible quality.</p>
	<p>TeroMed™</p>	<ul style="list-style-type: none"> • 60° engraving • long cell • roll for screen-line combinations 		<p>Our solution for your special inks/colors such as gold, silver and other metallic inks! Homogeneous, clean and sharp-edged line elements are the result of TeroMed™ engraving.</p>
	<p>TeroMax™</p>	<ul style="list-style-type: none"> • spiraled engraving • steep sides, flat bottom • good cleaning properties 		<p>TeroMax™ stands for a reliable and homogeneous ink transfer with an excellent ink density. A combination of screen / line elements is an every-day task for this type of engraving.</p>
	<p>TeroWhite™</p>	<ul style="list-style-type: none"> • high area coverage • our anilox roll for white print 		<p>White areas with a high coverage are the result of this specially developed engraving. Speeds up to 600m/min can be realized with this type of engraving.</p>
